Art Unit: 1631

DETAILED ACTION

Applicant's election without traverse of Group I (Specie A) in Paper No. 4, filed 10/16/02, is acknowledged.

If applicant desires priority under 35 U.S.C. § 120 based upon a previously filed copending application, specific reference to the earlier filed application must be made in the instant application. It is noted that this appears as the second paragraph of the specification following the title. The status of nonprovisional parent application(s) (whether patented or abandoned) should also be included. If a parent application has become a patent, the expression "now Patent No. ______" should follow the filing date of the parent application. If a parent application has become abandoned, the expression "now abandoned" should follow the filing date of the parent application.

If the application is a utility or plant application filed on or after November 29, 2000, any claim for priority must be made during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2) and (a)(5). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A priority claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed claim for priority under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) a surcharge under 37 CFR 1.17(t), and (2) a statement that the entire delay

Application/Control Number: 09/849,119

Art Unit: 1631

between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Commissioner may require additional information where there is a question whether the delay was unintentional. The petition should be directed to the Office of Petitions, Box DAC, Assistant Commissioner for Patents, Washington, DC 20231.

Claim Rejections - 35 USC § 112

Claims 1-53 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-53 are vague and indefinite in that the preamble of claim 1 cites the practice of active electronic control of biological reactions as the intended system usage or practice. Consideration of the actual claim limitations in all of claims 1-53 has failed to reveal any element which actively controls any biological reaction(s) in a clear and concise way. Clarification as to whether the preamble or the actual claimed system element limitations control the metes and bounds of the instant claims, via clearer claim wording is requested.

Claim 26 contains the unclear phrase "is in a by" in line 1. Clarification via clearer claim wording is requested as to the meaning of this phrase.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Application/Control Number: 09/849,119

Art Unit: 1631

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1, 5, 10-13, 15-17, 22, 23, 27, and 32-53 are rejected under 35 U.S.C. 102(b) and (e)(2) as being clearly anticipated either by Wei et al. (P/N 4,672,412).

Wei et al. discloses imaging arrays which thus cite row and columns of multiple unit imaging cells as required in the instant claims in the abstract, Figures 5 and 6 showing such arrays and electronics, respectively, and in the section entitled "DETAILED DESCRIPTION" starting in column 5. Row and column selection is clearly shown in figure 6 along with associated description. It is noted that the instant claims are unclear as to their metes and bounds and thus the row/column selection array systems of Wei et al. apparently anticipate the instant claims regarding biological control reaction system(s) even though they also do not cite biological elements pre se. Gating transistors for row and column addressing or selection are cited in column 8, line 36, through column 9, line 4, with current control therein via electron and hole accumulation and movement.

Claims 1, 5, 10-13, 15-17, 22, 23, 27, and 32-53 are rejected under 35 U.S.C. 102(e)(2) as being clearly anticipated by Zhao et al.(P/N 5,962,856).

Art Unit: 1631

Equivalent to the above reference, Zhao et al. disclose a imaging array with row and column field effect transistor selection etc. as shown in the Figures and summarized in the abstract. The "DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT" section starting in column 4 details the sensing electrodes, circuitry, etc.

No claim is allowed.

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CFR § 1.6(d)). The CM1 Fax Center number is either (703)308-4242 or (703)305-3014.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ardin Marschel, Ph.D., whose telephone number is (703)308-3894. The examiner can normally be reached on Monday-Friday from 8 A.M. to 4 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward, Ph.D., can be reached on (703)308-4028.

Any inquiry of a general nature or relating to the status of this application should be directed to Legal Instrument Examiner, Tina Plunkett, whose telephone number is (703)305-3524 or to the Technical Center receptionist whose telephone number is (703) 308-0196.
